

PIG Essentials Cellulose Fibre Loose Absorbent

PLPE240

For Oils, Coolants, Solvents & Water, Absorbs up to 24 L per bag, 1 Bag

More than three times more absorbent than typical clay granules means you'll use less material for spill clean up, reducing your labour and disposal costs.

- European-sourced, post-consumer recycled cellulose is carefully blended, processed into pellets, and then crushed to create the optimum bulk density for absorbent performance
- Non-abrasive composition won't harm finished floors or damage expensive machinery
- Environmentally conscious recycled material reduces the amount of waste entering landfill
- Absorbs and retains oils, coolants, solvents and water
- Ideal when "green" products are desired or required as part of your EMS
- Can be incinerated after use to reduce waste and to recover energy
- Lightweight 8kg bag is easy to handle

Specifications

Absorbency Per Selling Unit	Up to 24 L per bag
Colour	Grey
Composition	Cellulose
Fluids Absorbed	Oils, Coolants, Solvents & Water
Recycled Material	100% Post-Consumer Recycled Cellulose Waste
Volume	23 ltr. Bag
Weight	8 kg
Sold as	1 Bag
